PORTFOLIO

breezefree

Over nearly 20 years, Breezefree's customers have come to depend upon the reliability, long life and elegance of our alfresco packages.

Our dynamic team has the extensive knowledge and experience to design, diversify and walk you through a full spectrum of commercial and residential projects, providing you with ingenious multi disciplined design ideas that will bring any vision to life.

Breezefree's well coordinated supply chain of top international companies offers retractable glazed roof and facade solutions, through retractable louvered and pergola roofs, to retractable portable barrier systems, as shown in this products portfolio.

Our planning and project management service is here to assist you, from first contact right through installation to aftercare, making every project a breeze.

VISION & DESIGN

We create versatile and engaging alfresco spaces; we've been doing so for over 20 years, driven by our passion for outdoor living.

Collaborative Visioning achieves the very best solutions by integrating design disciplines and bringing key considerations into sharp focus. This not only ensures that development and operational issues are foreseen, but frequently results in final installations exceeding expectations.

We design for clients, and co-design with many interior designers and architects in a consultative capacity.

Our Visioning and Design service is available to all customers and has proved highly successful in gaining pre-application and full planning permissions for clients.

Breezefree will realise your vision and our design expertise will make your project take flight!

PERGOLAS

Providing fully adjustable shade and shelter over a wide area, Pergola Awnings make the perfect choice for larger terrace spaces. Constructed from durable materials and with minimal maintenance required, they are effectively an alternative to building an extension.

- Particularly well suited to covering large areas
- Metal pergola (steel, aluminium) or wooden pergola options available in a wide range of colours
- Motorised adjustment of shade and shelter
- Wall supported or free standing

LOUVRES

Sometimes referred to as outdoor living pods, adjustable louvred roofs are the ultimate in contemporary styling for outdoor spaces.
The partnership of modern clean lines and superior engineering means louvre panels make a design statement, while providing perfectly adjustable shade and shelter.

- Suitable for large and small areas alike
- Ground-fixed aluminium louvres construction
- Integrated guttering available
- Adjustable glass sides and flexible screens options
- The Aerolux model is 100% waterproof and draught-proof

PAGODAS

Breezefree's pagodas are tensile roof structures that combine cutting-edge materials with the more traditional styling of a marquee or gazebo. Modular in nature, their endless configurations make them suitable for large and small areas alike.

- The pagoda's inclined roof can withstand whatever the weather throws at it
- Optional integrated guttering for full weatherproofing
- Temporary or permanent ground fixing options
- Roofs are made of PVC; variants include mesh, translucent, blackout and textured
- Steel or wooden pagoda frames available in a wide range of colours
