Introduction

Our high specification Sail Awnings create eye-catching additions to any establishment as well as offering practical and attractive shelters for your customers.

Sail Awnings can be fixed or retractable (operated either manually or electronically) and are an ideal solution for colourfully filling interior or exterior space, and for accommodating unusually shaped areas not suited to regular shading systems.

Sail Awnings are available flat, angled or anticlastic. They are functional in all weathers and will complement any building externally or internally. They can be employed simply for visual effect as they are a stylish addition to any open space and when used externally, enjoy the support of many UK local planning authorities, particularly in residential or conservation areas, or upon listed buildings.

Features

- Fixed or retractable.
- Retractable Sail Awnings can be either manually or electrically operated.
- Custom made to fit irregular shaped spaces, including triangular, rhomboid, parallelogramic, trapezoid and cut-around.
- Available in a wide choice of materials and colours.
- Translucent or opaque fabrics can create a variety of ambient light levels
- Various rigging options: flat, angled or anticlastic.
- Cable reinforcing and storm cornering enables large areas to be covered.
- Membranes are easily printed on either or both sides.
- 100% weatherproof membranes.
- SmartScreens or Rigid/Sliding Terrace Screens for free standing front & side sheet options.
- Option of integrated heating, lighting and sound options.

Fixed SailAwnings

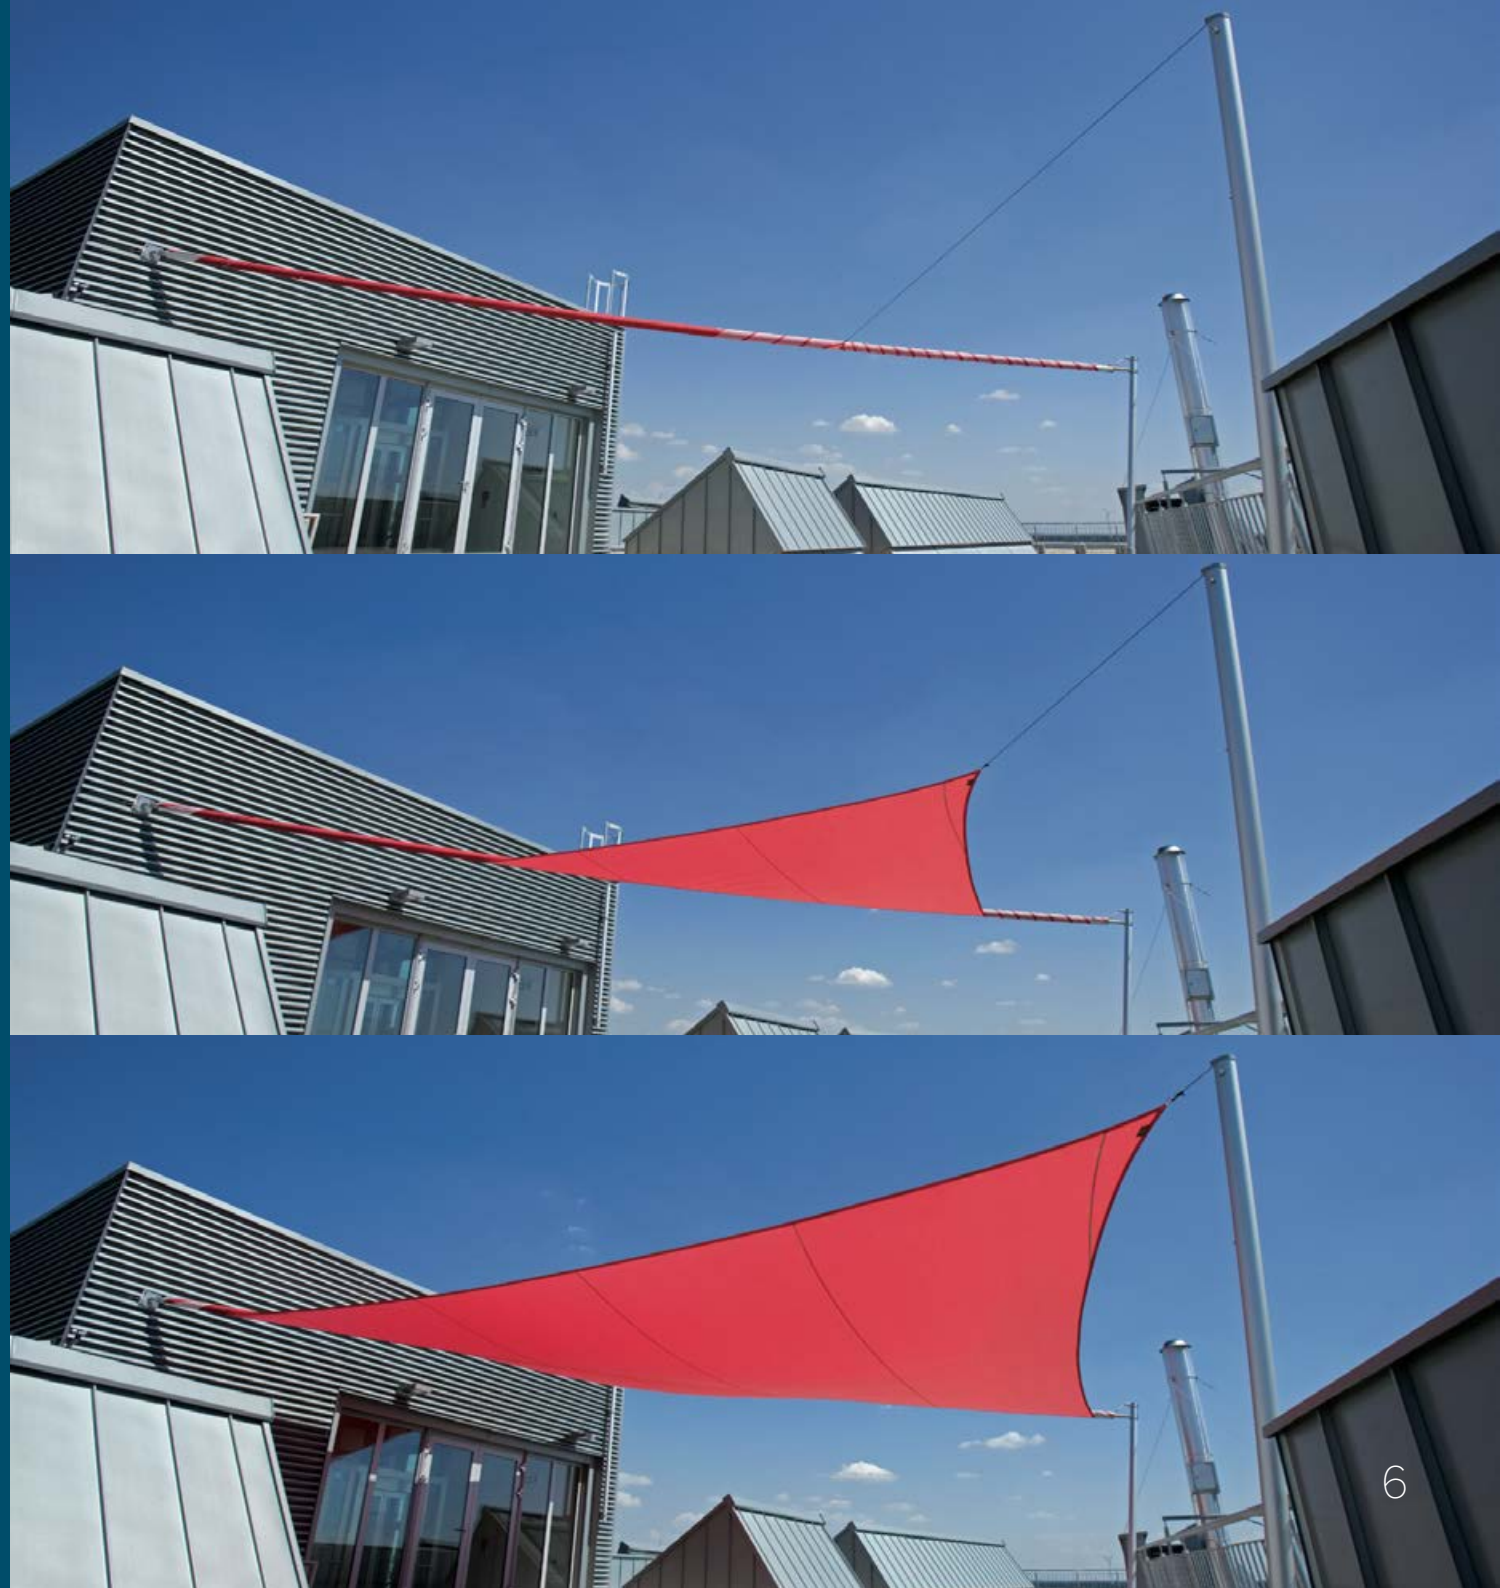

Creating a unique look to any space, fixed Sail Awnings can be used as functional and stylish shelters or simply for aesthetic effect. SailAwnings are a bespoke product and offer a multitude of configurations.

Retractable SailAwnings

Sail Awnings are typically static, but manual or motorised retractable operation can also be employed. Manual rope pull and winch operated Sail Awnings up to 65sqm or remote motorised operation up to 85sqm are available.

Fabric & Branding

A variety of fabrics ranging from canvas to PVC are available for different situations. Fully branded, lightweight fabrics, which make for excellent branding opportunities, can also be employed for internal use.
